SKINCU COLOR CHANGING LIPSTICK

Same Mouth, Two Formulas | MUA demo | 3 hooks + 1 main script | approx. 2:32

PART 1 | HOOKS

Three openers. All run to 00:08 and hand over to the shared body at 00:09.

HOOK A | Direct adaptation

CLIP / TIME	SCRIPT
00:00	*ACTION: A woman over 50 in the chair. The artist holds up her own well used lipstick, unbranded, worn down.*
00:00	**MUA:** She's worn the same tube, in the same shade, every single day for ten years.
00:04	**MUA:** Watch what happens when I take it off and use the one that's going viral on Facebook.

The source opening with the brand removed. Ten years, same tube, same shade, is more damning than any brand name, because it is the viewer's own habit being described. This is the control.

HOOK B | Tested on twenty two year olds

CLIP / TIME	SCRIPT
00:00	*ACTION: Close on the client's mouth, colour sitting in the lines above the lip.*
00:00	**MUA:** Almost every lipstick on the shelf was tested on twenty two year olds.
00:05	**MUA:** Then the exact same formula gets handed to a woman over fifty, and everybody acts confused when it's in her lines by lunchtime.

Pulls the argument from 00:14 to the front. It accuses the industry rather than her, which is the fastest route to a woman who has decided the problem is her own mouth.

HOOK C | Not your lips, not your age

CLIP / TIME	SCRIPT
00:00	*ACTION: The artist to camera, client in the chair behind her.*
00:00	**MUA:** If your lipstick is in the lines round your mouth by lunchtime, it is not your lips and it is not your age.
00:06	**MUA:** Let me show you what it actually is. Same woman, same mouth, two formulas.

Opens on the thesis and promises the proof. The only hook of the three that tells the viewer in the first six seconds that this is not her fault, which is a different kind of scroll stop than curiosity.

PART 2 | MAIN SCRIPT (SHARED BODY)

Runs identically under all three hooks.

CLIP / TIME	SCRIPT
00:09	*ACTION: Montage of the artist working on women over 50.*
00:09	**MUA:** I do makeup on mature lips every single day. And here's what nobody tells you.

CLIP / TIME	SCRIPT
00:14	**MUA:** Almost every lipstick out there was tested on twenty two year olds.
00:18	**MUA:** Then the exact same formula gets handed to a woman over fifty, and everyone acts confused when it falls apart by the afternoon.
00:25	**MUA:** It was never made for her lips.
00:27	*ACTION: Her usual lipstick going on. Close. It looks good.*
00:27	**MUA:** So let me show you the difference, on the same mouth.
00:30	**MUA:** Here it is going on now. On the first application, it's fine. It always is.
00:36	*ACTION: TIME STAMP ON SCREEN. A few hours later. Macro of the same mouth.*
00:36	**MUA:** But watch what it does. This is the same lipstick a few hours in.
00:41	**MUA:** It's crept past her lip line. It's gone patchy where her lips are dry. And by the afternoon the shade has gone flat on her.
00:49	*ACTION: The artist to camera, holding the worn down tube.*
00:49	**MUA:** And this isn't her doing anything wrong.
00:52	**MUA:** It's a fixed shade, pressed into a formula in a factory, sitting on top of her lips.
00:58	**MUA:** It can't adapt to her. So it moves, and it makes her look tired.
01:02	*ACTION: She wipes it off. Then uncaps the new tube. Hold on the clear bullet.*
01:02	**MUA:** Now watch what happens when I take it off and use the one that's been going viral.
01:07	**MUA:** And here's the part that looks strange for a second. It comes out completely clear.
01:12	**MUA:** My clients are always shocked. They go, there's no way that's a lipstick.
01:16	*ACTION: One swipe. Hold, no cut. The colour develops on her mouth in real time.*
01:16	**MUA:** But about thirty seconds in, it develops right into her own colour.
01:21	**MUA:** Not a close match. Hers.
01:23	**MUA:** No shade to pick. No wrong match. It reads the pH of her own lips and builds the colour out of that.
01:31	*ACTION: Close on her mouth. No filter. The lines above her lip are clearly visible.*
01:31	**MUA:** Now look. The lines round her mouth are still there. They haven't gone anywhere and they're not going to.
01:38	**MUA:** The colour just isn't sitting in them. And she looks like herself again.
01:43	**MUA:** And unlike the one she's been buying for ten years, this one won't turn on her,
01:48	**MUA:** because it binds to the lip instead of sitting on top of it. There's nothing on the surface to travel.
01:54	**MUA:** It doesn't crack. It doesn't bleed. It doesn't go flat by dinner.
01:59	*ACTION: TIME STAMP ON SCREEN. 8PM. Same mouth, same frame, same light.*
01:59	**MUA:** What she looks like right now is what she'll look like at eight o'clock tonight.
02:05	**MUA:** One swipe. No topping up. No mirror.
02:09	**MUA:** And over 127,000 women over forty have already switched out their everyday lipstick for this one.
02:16	*ON SCREEN: It was never your lips. It was always the formula.*
02:16	**MUA:** So if your lipstick looks like her first mouth by lunchtime,

CLIP / TIME	SCRIPT
02:20	**MUA:** it is not your lips, and it is not your age.
02:24	**MUA:** It's the formula. It's called Skincu.
02:27	**MUA:** Buy one get one free right now, with a thirty day guarantee. Link's below.
